

Database Name: AddressBook

- **General Database Operation**

- *Select All Records (SelectAll)*
 - *Select Based on PK (SelectByPK)*
 - *Insert Record (Insert)*
 - *Update Record Based on PK (UpdateByPK)*
 - *Delete Record Based on PK (DeleteByPK)*
-

You have to create these all above mentioned procedures for all tables of AddressBook database with proper name & format.

Example

- Procedure Name Should be
 - **[dbo].[PR_TableName_Operation]**
- Let us say, if you want to create **Country Table's Stored Procedure** naming convention will be..
 - [dbo].[PR_Country_SelectAll]
 - [dbo].[PR_Country_SelectByPK]
 - [dbo].[PR_Country_Insert]
 - [dbo].[PR_Country_UpdateByPK]
 - [dbo].[PR_Country_DeleteByPK]
